INNOVATE

3D Headrest

The headrest adopts an ergonomic design, supporting up and down, forward and backward, and Angle adjustment, which better matches the neck

3D Lumbar Support

Auto-adjusts to movements, maintaining continuous contour contact.

Embrace Science

Work in ease

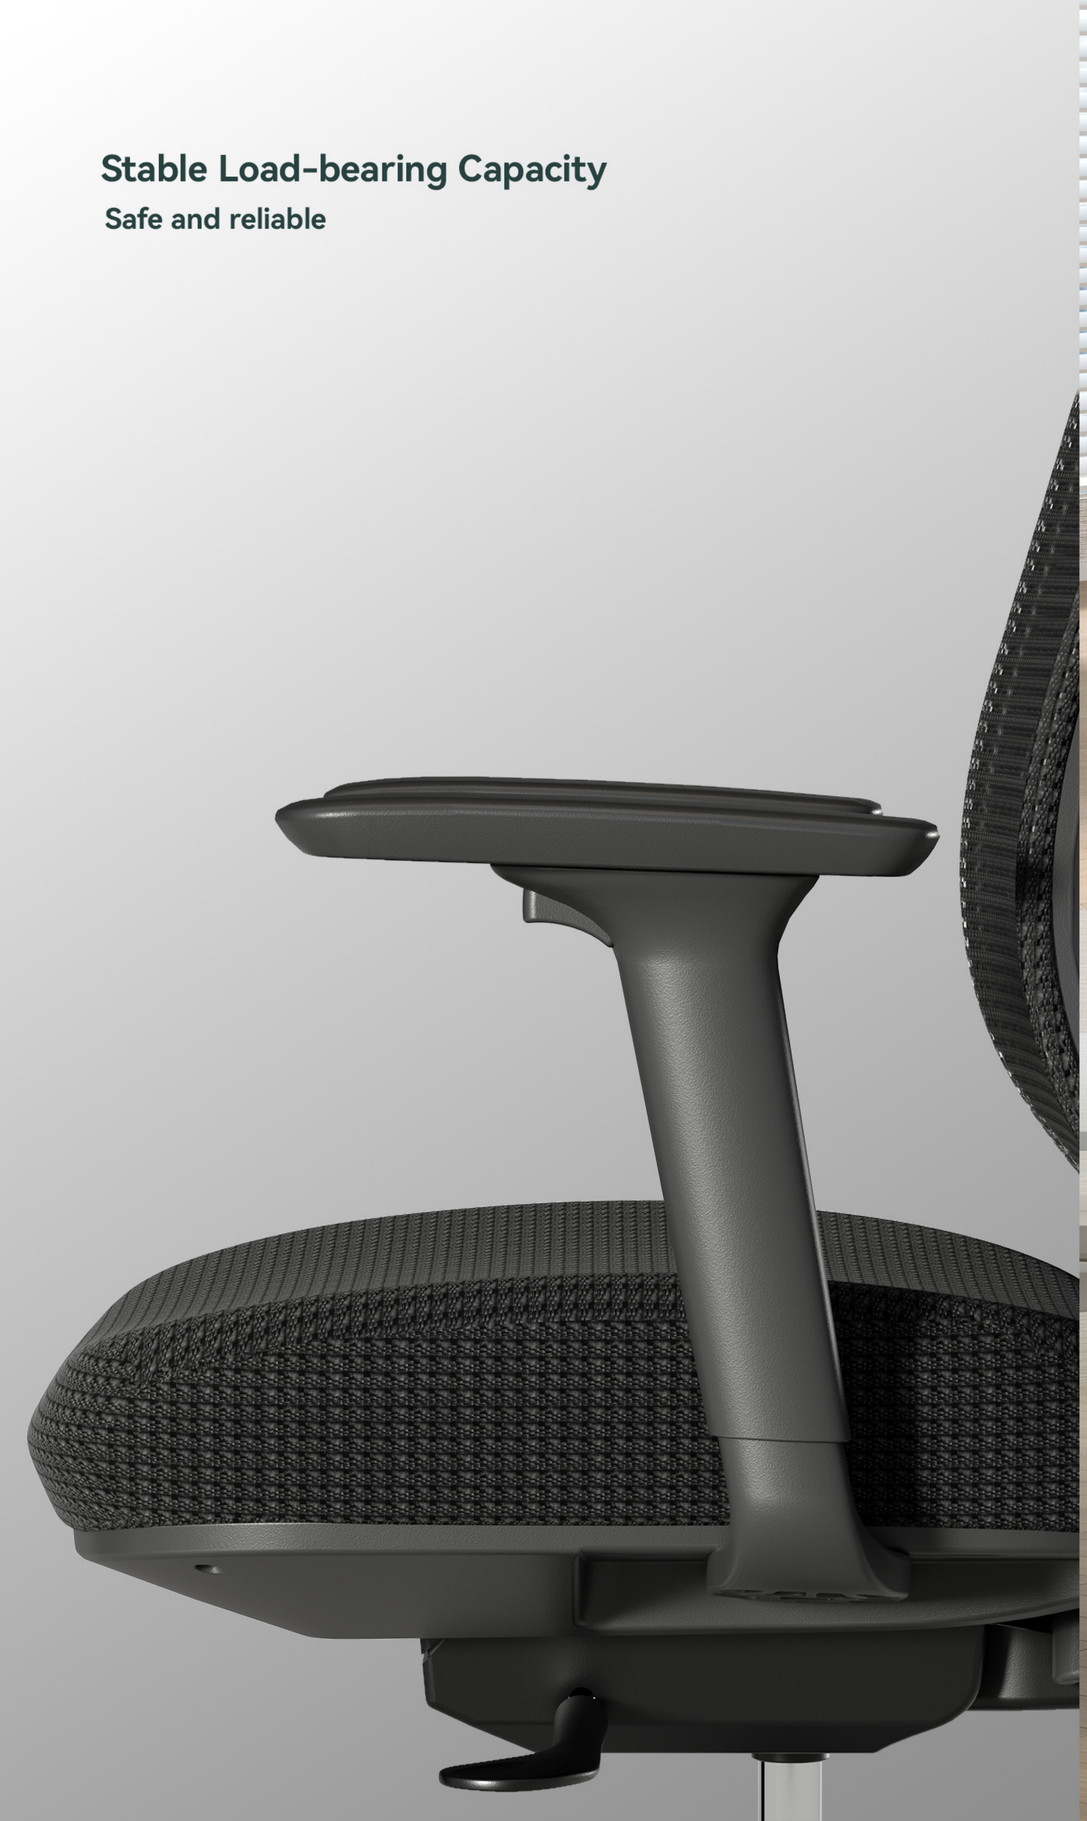

Stable Load-bearing Capacity

Safe and reliable

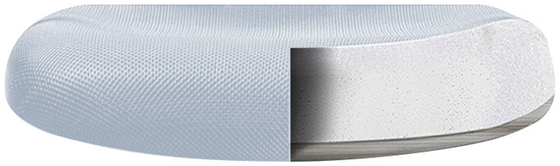

FUNCTIONS

High-density Molded Foam

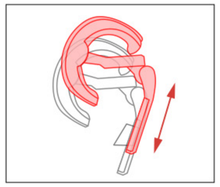

The knitted mesh fabric offers high breathability, even distribution, and long-lasting comfort. It conforms to the hip's curve and provides durable support.

Low-quality foam is harmful to health and prone to collapsing.

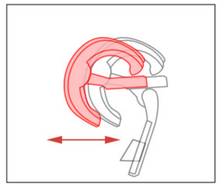

3D Headrest

The headrest can be adjusted in height, horizontal position, and angle to provide optimal neck support for all body types.

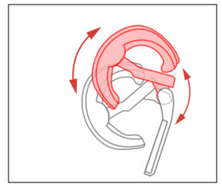

Height Adjustment

Fits users of different heights

Front and Back Adjustment

Accommodates a wider range of body types.

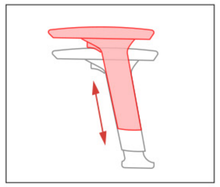

Angle adjustment

Offer customizable angles for support

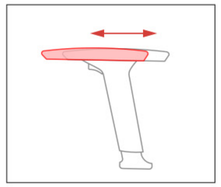

3D handrail

The armrest supports up and down, front and back, and angle adjustment, providing precise hand support for people of different body types and ensuring comfort.

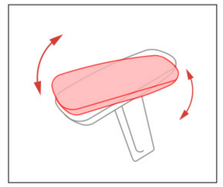

Height Adjustment

Fits users of different heights

Front and Back Adjustment

Adapt to different sitting positions

Angle adjustment

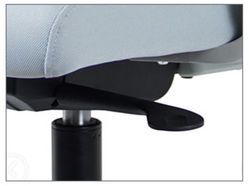

Provide different support angles

Seat Height Adjustment

Adapt to different body types of people.

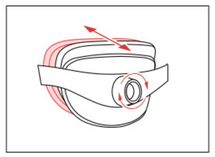

Smart Adjustment

The fixed armrests model comes with a carefree function, while the 3D armrests model can adjust the backrest angle and has a locking function.

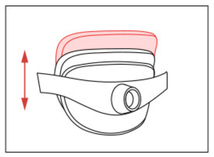

3D Lumbar Support with Precision Support Points

Featuring a dual-support wraparound design and verti-cal height adjustment, this ergonomic system delivers custom-ized lower back cradling for all body types. Its dynamic con-touring ensures firm, gap-free support to eliminate pressure points and discomfort.

Front and Back Adjustment

Accommodates a wider range of body types.

Height Adjustment

Fits users of different heights.
