PULSE / OFFICE SEATING

Black / mesh headrest

Front view

Rear view

A black mesh seat and back with a separate mesh headrest and lower support pad. The front and rear photographs identify the complete chair and its shaped rear frame. The lumbar controls visible in the black detail photographs belong to the photographed version; colour alone does not identify its mechanism or order code.

FINISH SHOWN

Black frame and mesh

HEADREST

Separate mesh headrest

SUPPORT SURFACES

Upper back, separate lower support pad and mesh seat

BASE

Metal-finish five-star caster base

Specify for your project

State quantities for this black headrest version with the current-production armrest design. Confirm the armrest connector finish, commercial model code, lumbar module, adjustment ranges, mesh sample and packing specification; do not assume the optional massage system is included.

Photographed options only. Dimensions and commercial SKU require confirmation.

PULSE / OFFICE SEATING

Light grey / mesh headrest

Front oblique view

Rear view

Light-grey mesh and a pale frame distinguish this headrest version. The separate lower support pad and mesh seat are visible from the front; the rear photograph shows the contrasting shaped support frame. This is a photographed finish and headrest choice, not evidence that it shares every function with the black version.

FINISH SHOWN

Light-grey mesh with pale frame and arms

HEADREST

Separate mesh headrest

REAR STRUCTURE

Contrasting dark shaped support frame

BASE

Metal-finish five-star caster base

Specify for your project

Specify quantities for the light-grey headrest version with the current-production armrest design. Confirm the armrest connector finish, commercial model code, mesh and frame samples, lumbar option, adjustment ranges and packing details independently of the black version.

Photographed options only. Dimensions and commercial SKU require confirmation.

PULSE / OFFICE SEATING

Black / without headrest

Front reference view 1

Front reference view 2

This photographed black version has an open upper profile without a headrest, with separate upper-back and lower-support mesh surfaces above the mesh seat. Both images are front reference views of the headrest-free chair, not a rear view or a demonstration of adjustment travel. Specify this version separately from the black headrest option.

FINISH SHOWN

Black mesh and frame

HEADREST

No headrest in the photographs

SEAT AND BACK

Mesh surfaces with separate lower support pad

BASE

Metal-finish five-star caster base

Specify for your project

State quantities for the black headrest-free version with the current-production armrest design. Confirm the armrest connector finish, adjustment specification, commercial model code, lumbar specification, seat adjustment and finish samples. The photographs do not establish retrofit headrest compatibility.

Photographed options only. Dimensions and commercial SKU require confirmation.

jimmychou@duledule.com | www.duledule.com

PULSE / OFFICE SEATING

Light grey / without headrest

Front reference view 1

Front reference view 2

The light-grey headrest-free chair retains the distinct upper-back and lower-support mesh surfaces, with pale arms and a metal-finish caster base. The two front photographs document this visible finish and profile. They do not establish electrical functions, exact adjustment ranges or interchangeability with a headrest version.

FINISH SHOWN

Light-grey mesh with pale frame and arms

HEADREST

No headrest in the photographs

SEAT AND BACK

Mesh surfaces with separate lower support pad

BASE

Metal-finish five-star caster base

Specify for your project

Specify quantities for the light-grey headrest-free version with the current-production armrest design. Confirm the armrest connector finish, adjustment specification, commercial model code, mesh and frame samples, lumbar specification and packing details before ordering.

Photographed options only. Dimensions and commercial SKU require confirmation.
