EXECUTIVE SEATING / THREE PICTURED CANDIDATES

Qimu Upholstered Seating

Compare two high-back candidates with a separate mid-back option. Specify each candidate separately; these are not confirmed colour variants of one commercial model.

High back / light grey upholstery

High back / cream upholstery

Mid back / grey upholstery

The pictures show appearance, not proof of genuine leather, solid wood, mechanism performance or a shared commercial SKU. The following pages retain the separate photographed profiles and confirmation items.

Prepare your project brief

State the selected candidate, quantities, intended room use and preferred finish. Confirm the commercial model code, upholstery composition, shell material, mechanism, packing and delivery terms before ordering.

QIMU / PICTURED CANDIDATE 01

High back / light grey upholstery

Complete product view

Side detail

A tall upholstered back with a padded upper section, a separate seat cushion and padded arm tops. The background-isolated front view shows the complete chair and five-star caster base; the paired side detail shows the arm support and warm wood-effect shell edge. These views refer to the light-grey high-back candidate only.

Back profile: High upholstered back

Upholstery appearance: Light grey

Rear shell appearance: Warm wood effect

Base shown: Metallic-looking five-star caster base

State quantities, office use and preferred finish. Confirm the commercial model code, upholstery composition, shell material and mechanism specification before ordering.

QIMU / PICTURED CANDIDATE 02

High back / cream upholstery

Complete front view

Complete three-quarter view

A cream-coloured upholstered high back and separate seat cushion above a metallic-looking five-star caster base. Background-isolated front and three-quarter views show the complete chair, including its padded arm tops. These processed presentation images support finish comparison, not verification of upholstery composition or mechanism performance.

Back profile: High upholstered back

Upholstery appearance: Cream

Arm tops shown: Padded top surfaces

Base shown: Metallic-looking five-star caster base

Specify quantities and the required cream finish. Confirm the commercial model code, upholstery composition, shell appearance and mechanism; do not assume it shares the light-grey chair's specification.

Prepare your project brief

State the selected candidate, quantities, intended room use and preferred finish. Confirm the commercial model code, upholstery composition, shell material, mechanism, packing and delivery terms before ordering.

QIMU / PICTURED CANDIDATE 03

Mid back / grey upholstery

Complete product view

Side detail

A shorter grey upholstered back with curved arm supports and a separate seat cushion. The prepared white-background front view shows the complete profile; the clean side detail shows the arm support, seat and wood-effect rear shell. This mid-back candidate is separate from the high-back candidates. Presentation images do not establish commercial model equivalence, materials or mechanism performance.

Back profile: Mid upholstered back

Upholstery appearance: Grey

Arm supports shown: Curved supports with padded tops

Base shown: Metallic-looking five-star caster base

State mid-back requirements, quantities and intended room use. Confirm the commercial model code, upholstery composition, mechanism and caster compatibility before ordering.
